BENNYHINN BEZAWADA

sunnyashish41@gmail.com 6300659698 BENNY HINN BEZAWADA Benny45123

Profile

Full-Stack Developer with strong experience in building scalable backend systems and AI-powered applications. Skilled in designing efficient data pipelines, RESTful APIs, and high-performance web platforms using modern technologies. Experienced in integrating LLM-based features, optimizing system performance, and deploying applications using Docker, CI/CD pipelines, and cloud infrastructure. Strong foundation in Data Structures, system design, and distributed systems.

Projects

Gov-Transparency-RAG | High-Performance Legal Intelligence Platform

- Engineered a high-performance RAG system using **Gemini-embedding-001** and **Pinecone** to index 2,000+ federal court records, utilizing **BeautifulSoup** and **PyMuPDF** for structured data extraction.
- Architected a **Multi-Stage Retrieval Pipeline** with semantic ANN search and **Cohere reranking**, optimizing factual precision and neutral information retrieval from sensitive legal documents.
- Reduced latency and cost via a **Redis caching layer**, asynchronous **Supabase** logging, and a custom batching pipeline designed to handle high-throughput API rate constraints.

Technologies Used: Python, LangChain, Pinecone (Vector DB), LLMs(Gemini-2.5-Flash,Llama-3.3-70B) , Supabase, Postgres, FastAPI, PyMuPDF, Pytesseract, BeautifulSoup4, Pandas, Curl-cffi

CareerForgeAi - End-to-End AI Career Preparation Platform

- Developed an AI platform using **Gemini** and **LangChain** for ATS-optimized resume analysis and context-aware cover letter generation.
- Engineered a **Segmented RAG Pipeline** with **Pinecone** to generate project-specific mock interviews, utilizing a **Dual-Model** architecture for real-time evaluation.

Technologies Used: Next.js, React, Node.js, Express.js, MongoDB, LLMs (Gemini-2.5-flash,Gemini-embedding-001,Gemma-3-1b-it), LangChain, Multer , Tailwind CSS, REST APIs, JWT, PineCone(Vector DB)

CampusConnect - Connecting students through stories, ideas, and collaborative learning

Developed a full-stack content-sharing platform with secure authentication, article publishing, and personalized user features. Optimized performance using caching and rate limiting, and deployed scalable services with containerized CI/CD pipelines.

Technologies Used: AWS-EC2, GitHub-Actions(CI/CD), Node.js, Express.js, Rate-Limiting, Redis(Caching), Cloudinary, Docker, DockerHub, GitHub Self-Hosted Runner, TailwindCSS

Technical Skills

AI & Data
Agents, RAG, Segmented Retrieval, Semantic ANN Search, Hybrid Search, Re-ranking (Cohere), Multi-Query Retrieval, LangChain, Pinecone (Vector DB), BeautifulSoup4 (Web Scraping), PyMuPDF/OCR (Data Extraction), Pandas (Data Analysis), smolagents

Languages & Frameworks
C, Java, Python, JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js

DevOps & Cloud
AWS EC2, Docker, GitHub Actions (CI/CD), Jenkins (CI/CD), GitHub Webhooks, Self-Hosted Runners, Render, Vercel

Databases, Caching & Core Concepts
MongoDB, SQL, PostgreSQL, Redis, Supabase, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, REST API Design

Certificates

- Fundamentals of ai agents - HuggingFace,2026
- Palo Alto CyberSecurity Virtual Internship,2025
- Python Basics for Data Science - IBM, 2024
- MongoDB Node.js Developer Path-MongoDB,2025
- Joy of computing using Python-NPTEL,2025

Education

VVITU , GUNTUR Sep/2023 – Present
B.Tech in CSE (IoT, Cybersecurity & Blockchain) | **CGPA: 8.14**

Awards

Gold Medal – CodeVerse – Oct 2025, *Organized By Spaardha ACM (College-Level Tech Event)*

Participation - Internal Hackathon for SIH - 2025, *Conducted at College Level for SIH 2025*

Silver Medal - CodeSwap - Oct 2025, *Organized By IEEE (College-Level Tech Event)*
