Summary

Full-Stack Developer with strong experience in building scalable backend systems and AI-powered applications. Skilled in designing efficient RESTful APIs and GraphQL interfaces, data pipelines, and high-performance web platforms using modern technologies. Experienced in integrating LLM-based features, collaborating with cross-functional teams, and deploying applications using Docker, CI/CD pipelines, and cloud infrastructure. Comfortable working asynchronously in remote, distributed team environments. Strong foundation in Data Structures, system design, and distributed systems.

Projects

Gov-Transparency-RAG | *Python, FastAPI, LangChain, Pinecone, Redis, Supabase* | Frontend | Backend

- Engineered a high-performance RAG system using **Gemini-embedding-001** and **Pinecone** to index 2,000+ federal court records, utilizing BeautifulSoup and PyMuPDF for structured data extraction.
- Architected a **Multi-Stage Retrieval Pipeline** with semantic ANN search and Cohere reranking, optimizing factual precision and neutral information retrieval from sensitive legal documents.
- Reduced latency and cost via a **Redis caching layer**, asynchronous Supabase logging, and a custom batching pipeline; wrote **unit and integration tests** using Pytest to validate retrieval accuracy.

CareerForgeAI | *Next.js, Node.js, LangChain, Pinecone, MongoDB, Gemini* | Frontend | Backend

- Built an AI platform using **Gemini** and **LangChain** for ATS resume analysis, context-aware cover letter generation, and real-time mock interviews via a Pinecone RAG pipeline.
- Designed and consumed **RESTful APIs** and a lightweight **GraphQL** layer for flexible data fetching; collaborated with a UX designer to translate wireframes into polished, responsive interfaces.
- Integrated an automated job search engine utilizing real-time API aggregation to dynamically match open positions with analyzed user resume profiles.

CampusConnect | *Node.js, Express.js, Redis, Docker, AWS EC2, GitHub Actions* | Frontend | Backend

- Developed a full-stack content-sharing platform with secure authentication, article publishing, and personalized user features; followed **Agile sprint cycles** with regular code reviews and pull request workflows.
- Optimized performance using **Redis caching** and rate limiting, and deployed scalable services with containerized **CI/CD pipelines**; maintained code quality through peer code reviews and best-practice standards.

Technical Skills

Languages: C, Java, Python, JavaScript, TypeScript, HTML5, CSS3
Frameworks & Libraries: Next.js, React.js, FastAPI, Node.js, Express.js
Cloud & DevOps: AWS, Docker, Git, Jenkins (CI/CD), GitHub Actions
Databases & Caching: MongoDB, SQL, PostgreSQL, Redis
API & Testing: REST API Design, GraphQL, API Integration, Pytest, Jest, Unit & Integration Testing
Core Concepts: OOP, DBMS, OS, Computer Networks, Agile/Scrum, Code Review, Version Control
AI & Data: Agents, RAG, Segmented Retrieval, Semantic ANN Search, Hybrid Search, Re-ranking (Cohere), Multi-Query Retrieval, Pinecone (Vector DB), BeautifulSoup4, PyMuPDF/OCR, Pandas, smolagents, LangChain, LangGraph

Education

Vasireddy Venkatadri Institute of Technology Sep 2023 – Present
B.Tech in Computer Science & Engineering (IoT, Cybersecurity & Blockchain) | CGPA: 8.14 / 10 *Guntur, India*

Achievements

Gold Medal – CodeVerse, Oct 2025 | Organized by Spaardha ACM (College-Level Tech Event) | Link

Silver Medal – CodeSwap, Oct 2025 | Organized by IEEE (College-Level Tech Event) | Link

Cash Prize – Nexora, Mar 2026 | Organized by IEEE (Full Stack Expo) | Link

Certifications

AI Agents - HuggingFace, 2026 | Link

AWS AI Practitioner Challenge - Udacity(AWS), 2026 | Link

Networking Virtual Internship - Paloalto, 2025 | Link
